EPAM systems 

05/2022 – present | Newtown, Pennsylvania, United States

Working in frontend technologies like vue and angular, team working, organizing self and others.

Front end developer

Vivify ideas 

09/2020 – 05/2022 | Novi Sad, Serbia

Worked as front end developer, took more and more complex programming tasks overtime, in react and react native. 15+ web and mobile apps. Worked in small and big teams on various projects. Skilled in frontend frameworks, agile way of working and version control systems.

Major Projects

Sticky by Tobii pro

Online eye tracking software and survey tool that analyzes how your creative designs are being received by your target audience.

11/2021 – present

Big project with long history. We built new app and new features using old app front and back end. New app reworks and features in Vue2. Added features based on new business model on both versions of the app. Used scrum for project management. Worked on features and built pages by design. Various roles in the team, scrum master, three AI developers, three full-stack developers, one QA, and me as front-end developer.

Skills

JavaScript (Worked on chrome browser extension in vanilla JS)

React (Multiple big, and small projects, used react query and redux for state management)

React native (Worked on mobile apps, mvp, release, and maintenance.)

Vue (1+ year of experience in vue 2)

Courses

full-stack web programming

Vivify academy

01/2021 – 03/2021 | Novi Sad, Serbia

Learning object oriented programming in php, data bases in sql, advanced javascript and creating blog page as final assignment.

EyCrowd

01/2021 – 07/2021

Project with multiple front end repos, for admin panel and home app in react, and also mobile app in react native (android and ios).

Purpose of app is promoting marketing campaigns through mobile users who are in field promoters, defining their area on map where campaign happens. Scrum for project management. Django on backend. Very organised, and productive team. With leadership of two senior colleagues, two QA testers, two full-stack engineers and me as front end engineer. Practiced all good agile methodologies, from daily meetings, plannings to retros. I implemented various features on multiple repos (like notifications on mobile, user management on admin panel, home page from design, mobile interface etc)
